

Zoom is a way teachers can video conference with their students. The connection will happen from the teacher's end but the students do need to install Zoom first.

Steps: Go to the Software Center

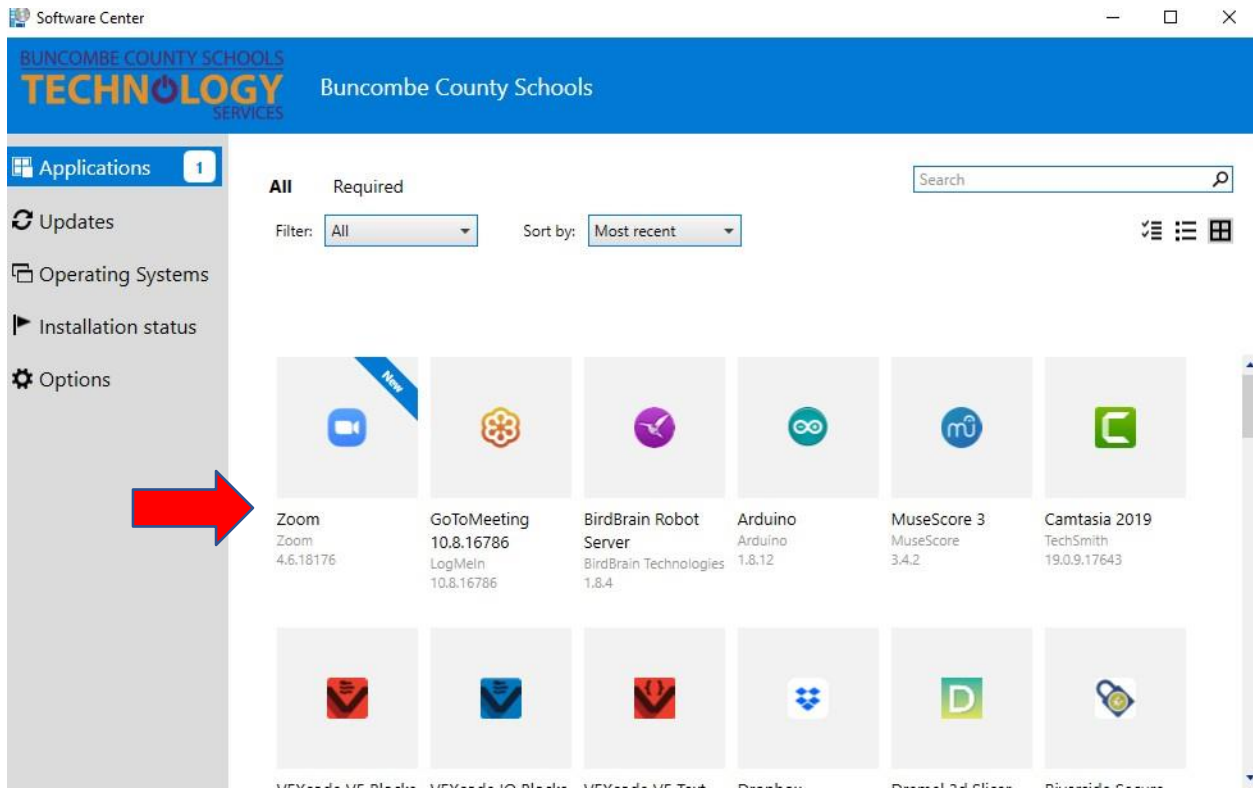

You can find the software center on the toolbar at the bottom of the screen or by clicking the windows icon in the lower left corner.

and find the Software Center

Open the Software Center and let all apps load before searching. If it does not open, close the program and try again.

Open link and install software.

Using Zoom- you will not go through the app that was just installed, instead you will use the link your teacher sends you and click to join a meeting.
